

Ethernet

Connect with success.

One of the best ways for businesses to foster growth is to improve internal efficiency and productivity. But without a reliable network solution, staying in close contact with employees spread across multiple locations can be challenging at best. Fortunately, Insight Business can help. Utilizing our state-of-the-art network, Insight Business can help extend your local area network (LAN) to a wide area network (WAN). Your WAN can be customized for the bandwidth and network configuration you require (point-to-point, point-to-multipoint, multipoint-to-multipoint). And it is scalable enough to grow as your business grows.

Insight Business brings you one of the most advanced fiber-optic networks, along with the expertise to tailor solutions that help connect your mission-critical data. In fact, Insight Business helps schools and banks establish private networks and also provides reliable solutions for a large, nationwide wireless telephone provider, backhauling traffic from their cell towers to Mobile Switching Centers (MSCs). The bottom line: whatever your business needs, Insight Business stands ready to deliver.

Don't get a provider. Get a partner.

At Insight Business, we partner with you by investing time to understand your business challenges and goals. Our dedicated account team works directly with you to develop scalable, cost-effective Ethernet solutions that are customized to your business needs. And since we're a facilities-based network provider, we can move quickly to meet the demands of new trends and technology, keeping you ahead of the curve.

Where you are, when you need us.

As a locally based company, helping local businesses be successful is our top priority. Your success is our success. We back up our products with some of the most accessible, attentive and reliable support in the industry. And with 24/7/365 monitoring from our dedicated support team and local Network Operations Center, you'll always receive immediate and proactive service.

Did you know?

Ethernet business services are emerging as the fastest growing worldwide wireline data network. In fact, research from Vertical Systems Group projects annual growth in the double digits for all regional markets in the world through 2014.

Local.

Our local Network Operations Center monitors customer lines 24/7/365, providing immediate and proactive service. Pick up the phone at any time and talk to a real person who can immediately address your concerns.

Cost-effective.

Insight Business Ethernet helps customers migrate away from the cost of supporting and maintaining legacy network technology (ATM, Frame Relay).

Reliable.

Your success is our top priority. With Insight Business you can enjoy peace of mind knowing you have access to one of the world's most reliable networks, right here at home.

Ethernet

Product benefits and features:

Reliable

Operate and maintain a robust optical MPLS network; bandwidth, delayed variation, and packet loss agreements

Productive

High-capacity data connections that easily extend beyond your LAN to your MAN or WAN

Flexible

Protocol neutral and ability to help interconnect your LAN via point-to-point connections, point-to-multipoint connections or multipoint-to-multipoint connections

Scalable

Bandwidth configurations from 3 Mbps to 10 Gbps speeds

Cost-effective

Next-generation network technologies that allow for easy-to-implement growth and are not distance sensitive

Local service and benefits:

Accessible

Personal service with immediate access to local support

Available

24/7/365 monitoring from our local state-of-the-art Network Operations Center

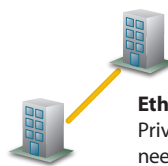

Attentive

Prompt, expert response from a local team of industry-certified, field-based technicians and engineers
